

Core competencies

Website operations & management — maintenance, security updates, monitoring, backups with tested restores, incident response, and day-to-day technical decision-making under a flat monthly engagement, on WordPress, Drupal, or a static build.

Accessibility & Section 508 — WCAG 2.2 AA auditing (axe-core engine plus manual keyboard and screen-reader passes), remediation in the theme or template layer, and ongoing automated compliance monitoring. Auditing is platform-independent; remediation is delivered in WordPress, Drupal, or static templates.

Custom web software — event registration with QR check-in, first-party cookieless analytics, spam screening without CAPTCHAs, client request portals, visual change tracking and full-site archiving. All built and operated in-house.

Rebuilds & migrations — WordPress, Drupal, and static-site rebuilds and platform migrations, executed on a fixed quote, landing in ongoing management on day one.

Differentiators

U.S.-based delivery with fifteen-plus years of web engineering — no anonymous rotation, no offshore queue; you always know who is responsible.

Fixed quotes in writing before work begins; out-of-scope work approved before it bills.

Privacy-first tooling: no Google trackers, no cookie banners, data on infrastructure we operate.

Every capability is demonstrable on lfw.com itself — see the [colophon](#).

Daily automated monitoring: accessibility, performance, broken links, email deliverability, TLS.

Past performance

LFW has no federal contract history. What follows is commercial work, described by organization type — clients are named only with written permission, and references are available on request.

National advocacy organization (501(c)(4)) — ongoing web operations: maintenance, security updates, monitoring, and day-to-day technical decisions under a monthly engagement.

LFW is its own reference. lfw.com runs custom software we built and operate — a self-hosted booking system, accessibility and performance monitoring, first-party analytics, spam screening without CAPTCHAs, and a client portal. The [colophon](#) documents how each piece works. Unlike a case study, it can be verified in a browser.

Company data

LEGAL NAME	Wevia LLC
STRUCTURE	Limited liability company, Commonwealth of Virginia
LOCATION	Arlington, Virginia (Washington, DC metro)
UEI	
CAGE	
NAICS	541511 Custom Computer Programming · 541512 Computer Systems Design · 541513 Computer Facilities Management · 541519 Other Computer Related Services · 518210 Data Processing & Hosting
INSURANCE
