League Manager Product Terms

Last updated November 14, 2026

Version 2.0, effective November 14, 2026. All legal documents (lfw.com/legal/). Download PDF (lfw.com/legal/lfw-league-manager-terms-v2.0.pdf).

These short terms cover only matters specific to League Manager. The MSA (lfw.com/legal/msa/), Hosted Software Subscription Schedule (lfw.com/legal/hosted-software-schedule/), DPA (lfw.com/legal/data-processing-addendum/) and your Order Form govern the subscription. If a government customer's contract or purchase order conflicts, its terms control, subject to mandatory law.

Programs and households

League Manager helps organizations manage programs, participants, teams, schedules, registrations and related messages and payments. The customer decides eligibility, pricing, waivers, refunds, staffing, safeguarding and program rules. Adult household account holders provide participant information for the customer's purposes. Families and participants are the customer's users, not LFW's customers.

Staff access and messages

The customer authorizes staff and their roles and must use the product's required second sign-in step. It chooses and funds enabled mail and text providers, sets messaging budgets and limits, obtains required consent and uses messages for its programs. It must honor opt-outs. No unlimited messaging or carrier delivery guarantee is included.

Payments and sensitive information

The customer is the merchant of record using its own Stripe account. LFW never holds its funds. Processing and any disclosed technology fee follow the Order Form and hosted-software schedule. No medical field or attachment feature authorizes PHI: a signed BAA and approved HIPAA environment are required first. The customer must limit collection of children's and health information to what it may lawfully process.

Price, trial and support

The Order Form sets price, setup, trial, term, renewal and any product-specific support or maintenance commitments. This page does not promise a universal price, free trial or uptime percentage. Business-hours support and any agreed service levels follow the hosted-software schedule. The product's accessibility report describes tested conformance and limitations; it is not a guarantee that every use is compliant.

Versions

This is product terms version 2.0. Earlier customer orders keep their agreed version unless changed in writing. The October 29, 2026 version 1 (lfw.com/legal/league-manager-terms/v1-0/) remains available. Product functionality and the customer's own privacy notice do not replace its signed contract.
